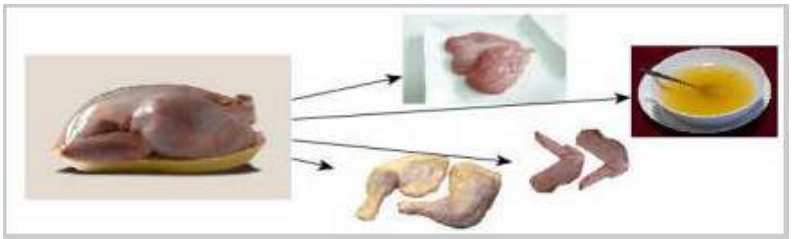
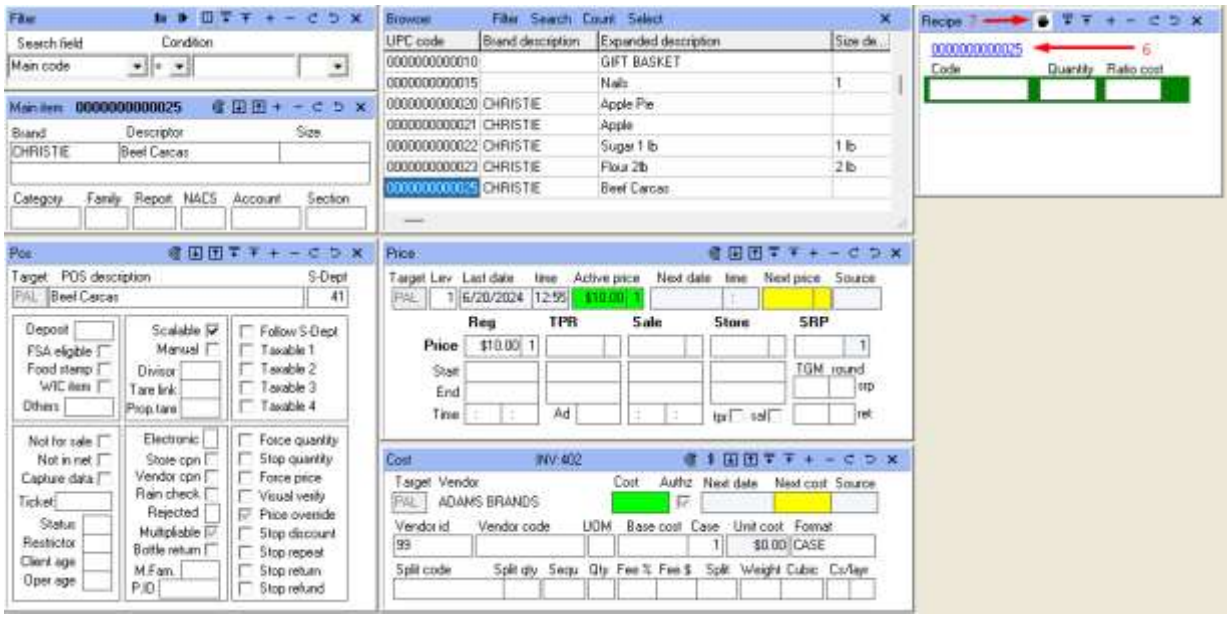
CREATION OF RECIPE ITEMS IN SMS

- **Creating A Recipe Containing Multiple Items Created From One Main Source Ingredient:**

Examples: Beef Sirloin, Chicken breasts, Instant Yeast, etc.



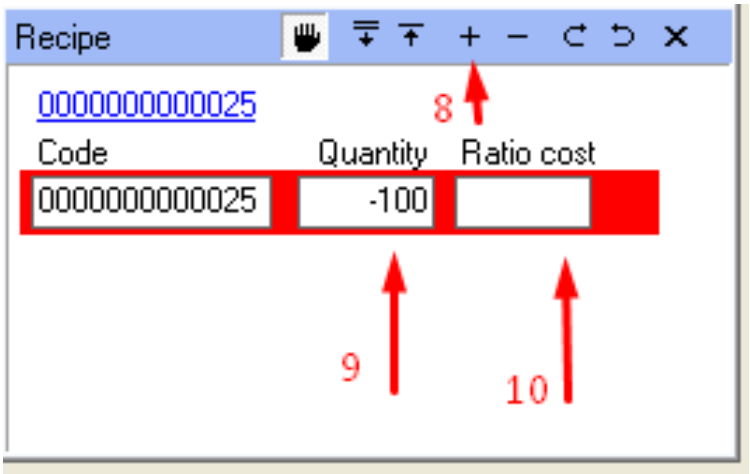
1. Log into SMS Pro
2. Open the following tables in SMS Pro
   a. **Filter**
   b. **Browser**
   c. **Recipe**
3. Before proceeding, ensure that the main recipe UPC and ingredients already exist in the Items table.
4. In the **Filter** table, search for the main recipe item ingredient. This will be the main source from which the items are made.
5. In the **Browser**, select the main recipe ingredient.
6. The **Recipe** table will now display the recipe item source ingredient UPC in blue.
7. Click the **Freeze View** icon to lock the recipe table to the main recipe ingredient.



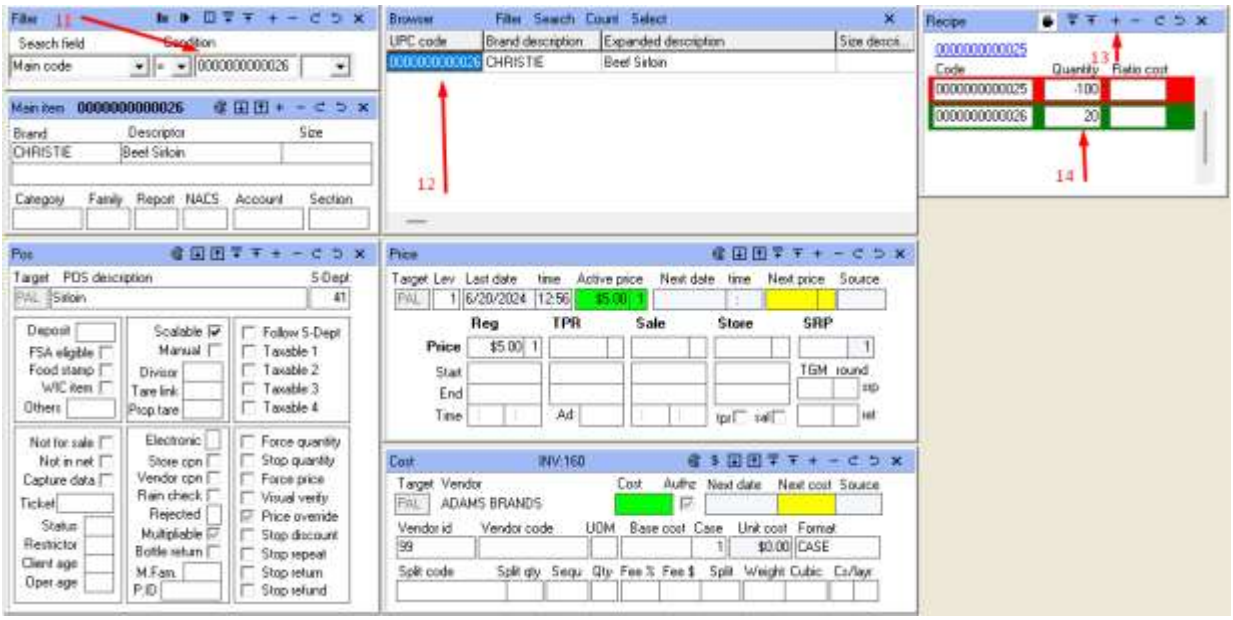
8. With the main ingredient still selected/highlighted blue in the **Browser**, click the green

highlighted area in the **Recipe** table to place the cursor in there, then click the **Add** icon + then add the main ingredient item to the first row.

9. Enter the amount of the ingredient item used as a source item for creating the other items within the recipe and press enter. The source quantity will always be negative as this is what will be used to create the produced items from the recipe.
10. Leave the **Ratio Cost** field empty.



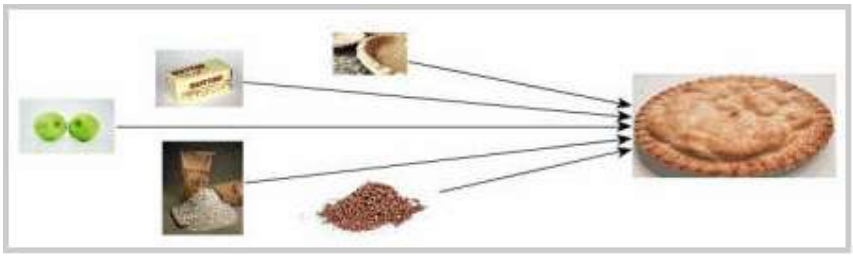
11. To enter the first item that will be created from this recipe, search for the item in the **Filter** table.
12. Select/highlight the item from the **Browser**.
13. Click the + in the **Recipe** table to add the first item to be produced.
14. In the **Quantity** field, input the amount that will be created for this item from the recipe.



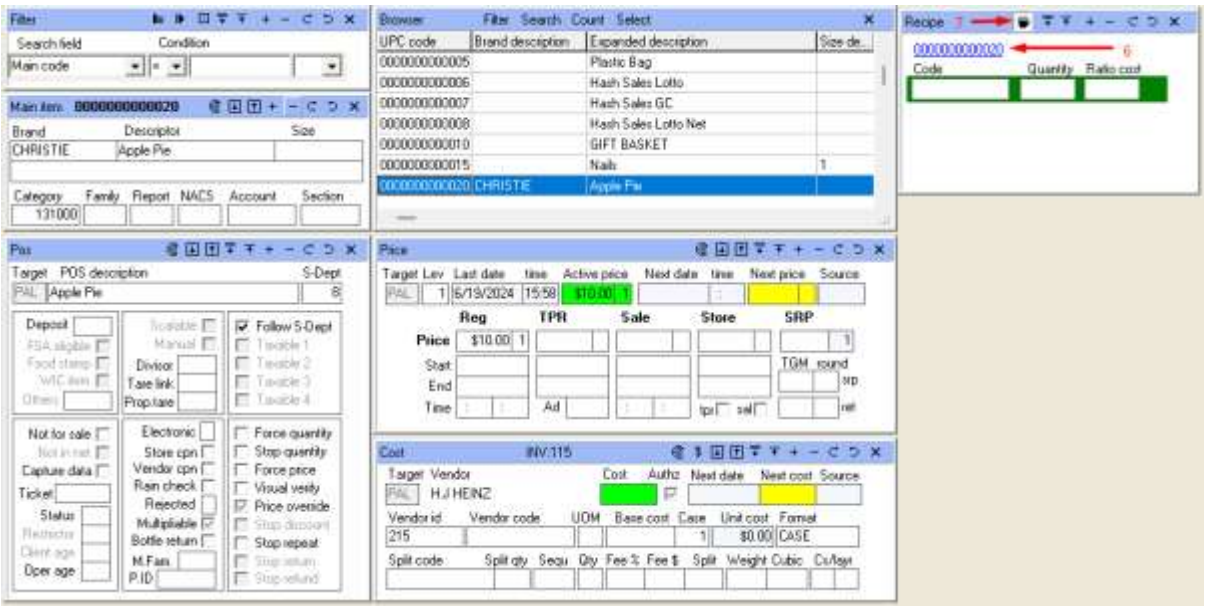
15. Repeat steps 11-14 to add more items to be created from the source ingredient of the recipe.

- **Creating A Recipe Containing A Single Main Item Made From Multiple Ingredients:**

Examples: Chocolate Cake, Apple Pie, Potato Salad, etc.



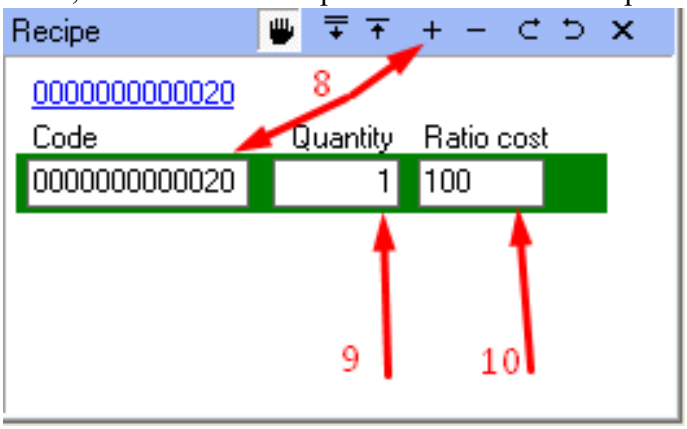
1. Log into SMS Pro
2. Open the following tables in SMS Pro
   a. **Filter**
   b. **Browser**
   c. **Recipe**
3. Before proceeding, ensure that the main recipe UPC and ingredients already exist in the Items table.
4. In the **Filter** table, search for the main recipe item. This will be the final product from which the ingredients are made.
5. In the **Browser**, select the main recipe item.
6. The **Recipe** table will now display the main recipe item UPC in blue with the first row highlighted in green.
7. Click the **Freeze View** icon to lock the recipe table to the main recipe item.



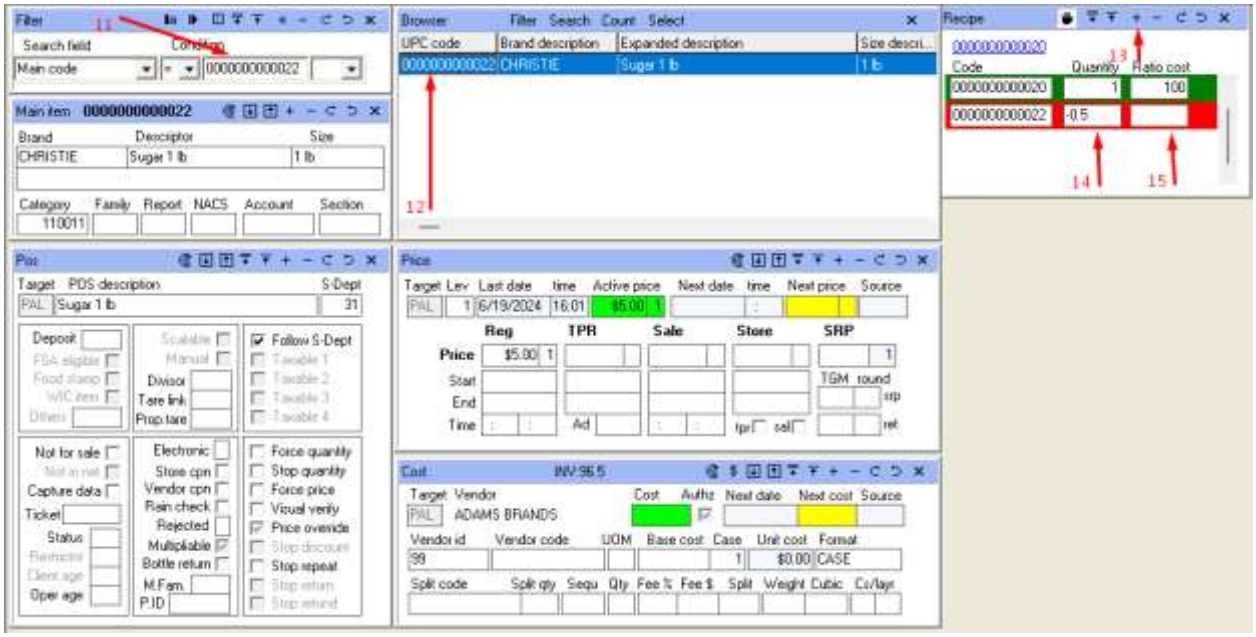
8. With the main item still selected/highlighted blue in the **Browser**, click the green highlighted area in the **Recipe** table to place the cursor in there, then click the **Add** icon

+ then add the main item to the first row.

9. In the **Recipe** table, enter the amount of the main recipe items to be created from this recipe in the quantity field. In most cases, this number will be 1 but this depends on the recipe and amount of ingredients being used.
10. In the **Ratio Cost** field, enter 100 for a recipe item made from multiple ingredients.



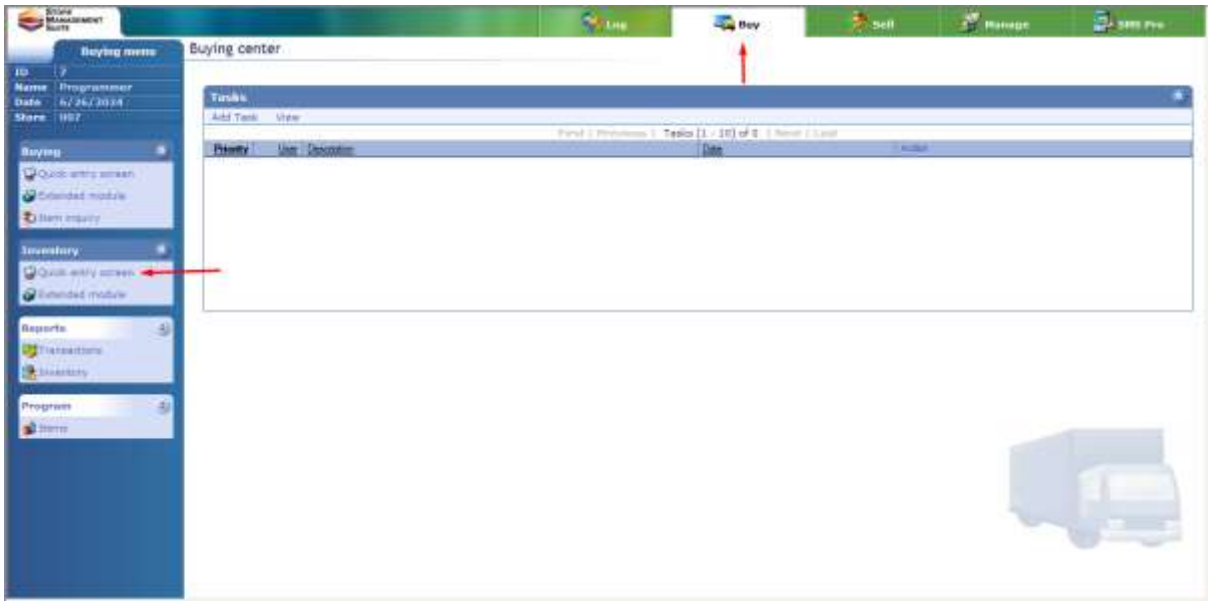
11. Use the **Filter** table to search for the first ingredient that will be used for the recipe.
12. In the **Browser**, select/highlight the ingredient that will be used.
13. In the **Recipe** table, click the + icon to add the first ingredient to the recipe.
14. In the **Quantity** field, place the amount that will be used from the ingredient in the recipe. This can also be a decimal quantity. e.g.: 0.5 or ½.
15. Leave the **Ratio Cost** field empty for the ingredient entries.



16. Repeat steps 11-15 for additional ingredients that will be added.

- **Production Of The Recipes:**

1. Log into SMS
2. Navigate to Buying Menu > Inventory > Quick entry screen.



3. From the Inventory screen, select **Packaging Screen** to bring up the packaging screen.
4. Scan or manually enter the UPC for the main item of the recipe that's being used and click on **Production item** to display the name of the recipe in the detail window.
5. Enter the quantity that will be produced from the recipe, then click on **Unit quantity**. Note: the quantity that is entered will be **MULTIPLIED** by the quantities of all the items on the **Recipe** table and will adjust the inventory accordingly.
6. Repeat steps 4 and 5 for any other recipes that are being produced.
7. Click **Close** to complete the recipe production and adjust the inventory.

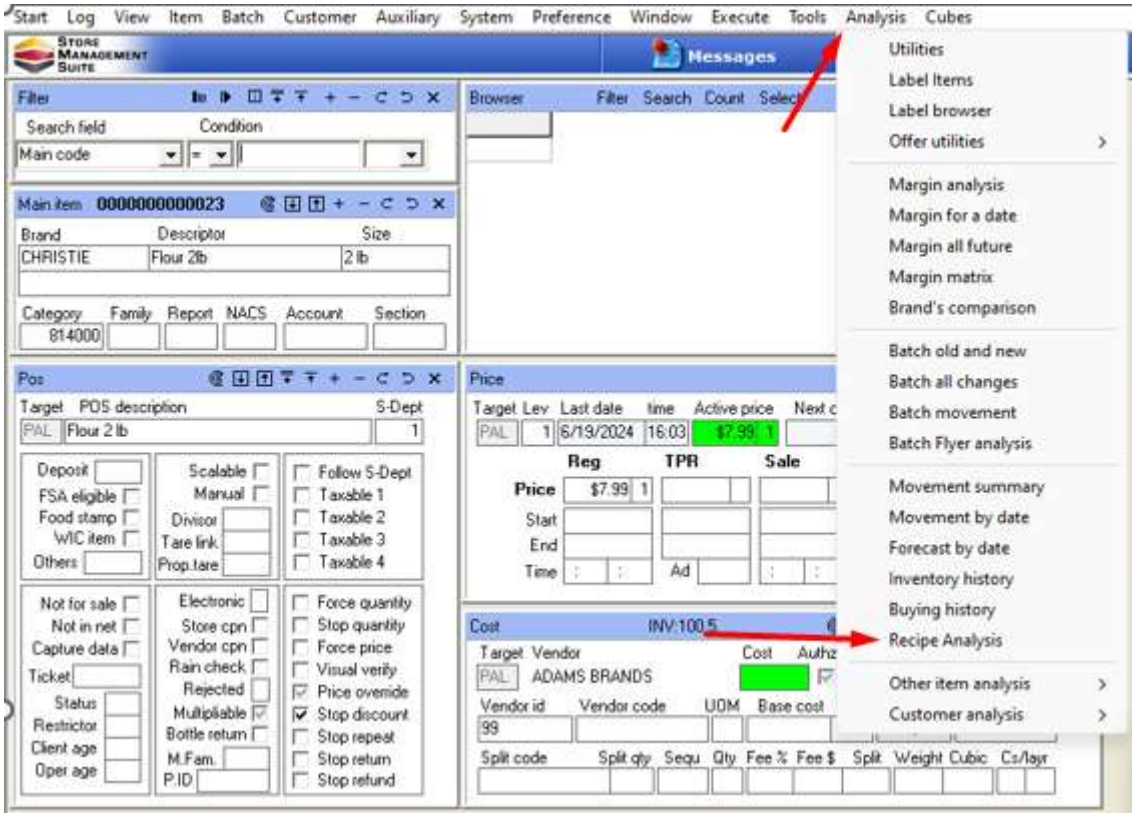
- **In Alternative:**
  1. Log into SMS
  2. Navigate to Buying Menu > Inventory > Extended Module

  3. Click **Items** from the top of the Inventory Module.
  4. Select/highlight the main UPC for the recipe that's going to be produced.
  5. Once highlighted, click on **Production** from the column on the left-hand side.
  6. From there, enter the quantity to be produced from the recipe and press enter. **Note**: the quantity that is entered will be **MULTIPLIED** by the quantities of all the items on the **Recipe** table and will adjust the inventory accordingly.
  7. Click **Lines** to verify the quantities that are being produced.
  8. Click **Close/Submit document** to complete the recipe production and adjust inventory.

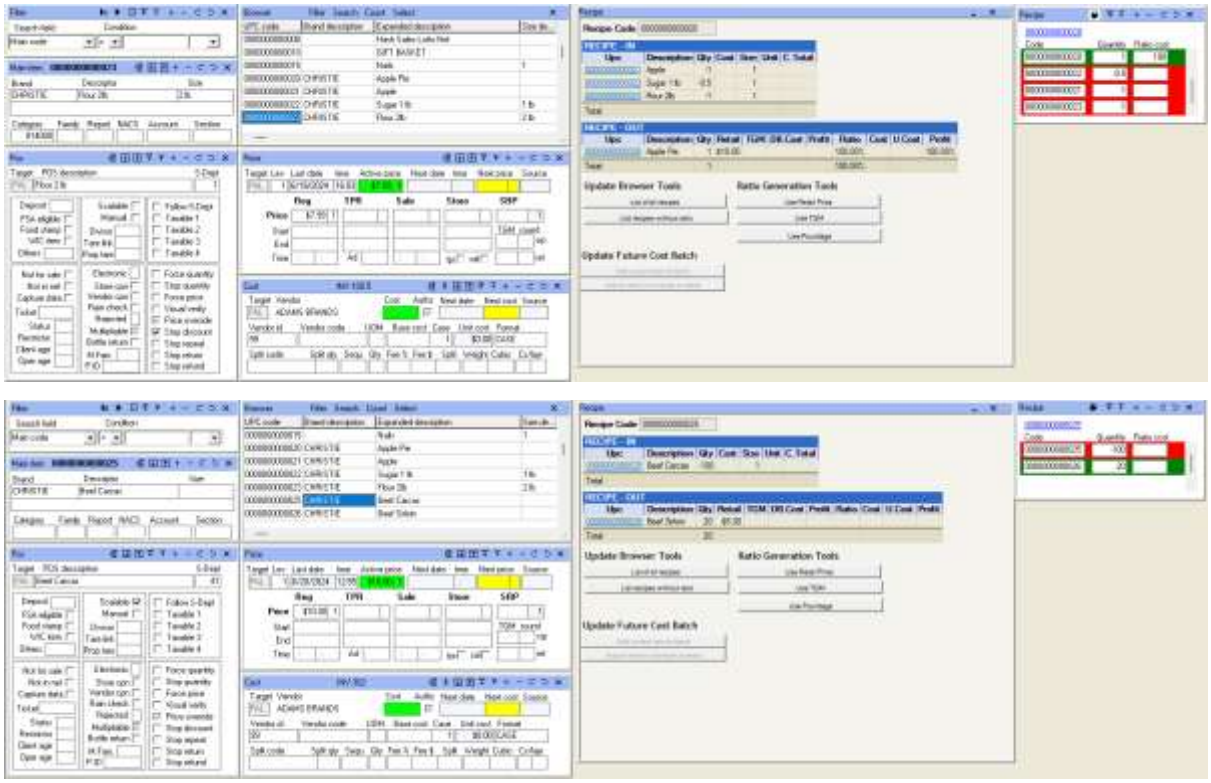
RECIPE ANALYSIS IN SMS PRO

1. Log into SMS Pro
2. Head to Maintenance and open the item maintenance tables.

3. Open the Analysis pull-down menu and click on Recipe Analysis.



4. Once the Recipe Analysis window displays, Open the **Recipe** table, and in the **Browser** select the main item from one of the recipes that have been created.



5. From there, the information will populate in the Recipe window.
